

I am concerned about LPFM stations to take priority over FM translators. There are two FM stations in my area, AIR1 & K-LOVE, that come by translator. These stations serve as a way for me to have programs that I don't have to worry about hearing objectionable words and music over. These stations also send support to local communities in time of disaster. I and my family would hate to take a chance on losing their wholesome programming. Please do not change the priority of FM translators.
